FREE SELF-CHECK · 9 PAGES · 10 MINUTES

How exposed is your personal data? Score it. Fix the top three.

Twenty-four yes-or-no questions across the six ways personal data gets out. Shade your map, and it hands you the three fixes that remove the most exposure for the least effort.

AI prompts that need no private data

BEFORE YOU START

Six ways your data gets out.

Most privacy advice treats these as separate problems. They aren't: a public record feeds a broker, a broker feeds a search result, a breach feeds a scam call. Scoring all six shows where your exposure actually comes from.

PATH	WHO EXPOSES IT	EXAMPLE
Stolen	Criminals, through a company's breach or malware on your device	Your email and password in a breach
Sold	Data brokers and people-search sites	Name, address and phone on a listing
Shared	Apps and services you signed up to	A shop sending what you bought to ad platforms
Published	Public bodies, because the law says so	Company register, open electoral register
Posted	You, or people who know you	A public profile with your birthday and employer
Indexed	Search engines and AI assistants	All of the above, found by typing your name

1 · Answer

Circle one answer per question on pages 3–4. **Yes = 2, Not sure = 1, No = 0.** "Not sure" counts, because not knowing is exposure too.

2 · Shade

Add up each path (0–8) and shade that many boxes on your map on page 5. Darker means more exposed.

3 · Fix

Take your two darkest paths and pick fixes from page 6. Three fixes, about 30 minutes. Then date your snapshot.

This is a snapshot, not a verdict. It checks what you can see from where you sit. A low score means less exposure in what you checked, not that you are safe; a high score means a clear place to start.

1 · Stolen

Breaches and malware

	NO	NOT SURE	YES
My email appears in at least one breach at haveibeenpwned.com.	0	1	2
I use the same password, or a close variation, on more than one important account.	0	1	2
My main email account does not have two-step sign-in or a passkey.	0	1	2
In the past year I've had a login alert or reset email I didn't trigger.	0	1	2

Stolen total (0–8) ☐

2 · Sold

Brokers and people-search

	NO	NOT SURE	YES
I get sales calls, texts or junk mail from companies I've never dealt with.	0	1	2
Searching my name and town shows a people-search or directory page about me.	0	1	2
UK: I haven't opted out of the open register. US: I've never opted out of a people-search site.	0	1	2
I enter competitions, surveys or comparison sites with my real details.	0	1	2

Sold total (0–8) ☐

3 · Shared

Apps and accounts

	NO	NOT SURE	YES
I have accounts I haven't used in a year that still hold my address or card.	0	1	2
My phone lets apps ask to track me across other apps.	0	1	2
I've never checked which businesses send my activity to Facebook or Instagram.	0	1	2
My browser doesn't send an opt-out signal such as Global Privacy Control.	0	1	2

Shared total (0–8) ☐

4 · Published

Public records

	NO	NOT SURE	YES
I am, or have been, a company director, or ran a business from home.	0	1	2
UK: I'm on the open electoral register. US: my voter or property record is public online.	0	1	2
Planning applications, licences or court notices list me at my home address.	0	1	2
A website or domain I own shows my name or address in its public registration.	0	1	2

Published total (0–8) ☐

5 · Posted

Profiles and posts

	NO	NOT SURE	YES
A stranger can see my birthday, employer or town on one of my profiles.	0	1	2
Old accounts with my real name still exist: forums, dating, CV or hobby sites.	0	1	2
I post photos that show my home, street, car registration or my children's school.	0	1	2
People can find my profile by typing my phone number or email.	0	1	2

Posted total (0–8) ☐

6 · Indexed

Search and AI

	NO	NOT SURE	YES
Searching my name shows a page with my phone, email or address.	0	1	2
Searching my phone number in quotes finds me.	0	1	2
An AI assistant gives correct personal details about me (prompt 1, page 7).	0	1	2
A reverse image search of my profile photo finds other sites using it.	0	1	2

Indexed total (0–8) ☐

STEP 2 · SHADE YOUR MAP

Your exposure map.

Shade one box per point for each path. Your two darkest rows are where to start.

	1	2	3	4	5	6	7	8	
Stolen									Light · Medium · Dark
Sold									Light · Medium · Dark
Shared									Light · Medium · Dark
Published									Light · Medium · Dark
Posted									Light · Medium · Dark
Indexed									Light · Medium · Dark

0–2 · Light
Less exposure found in what you checked. Recheck in three months.

3–5 · Medium
Real gaps. One or two fixes from page 6 will move it.

6–8 · Dark
Start here. Do this path's fixes this week.

My first three fixes

☐ **1 ·** _____ **done on ____**
From path: _____ · Time: _____

☐ **2 ·** _____ **done on ____**
From path: _____ · Time: _____

☐ **3 ·** _____ **done on ____**
From path: _____ · Time: _____

Snapshot taken on

Date: ____ / ____ / _____ · Total: ____ / 48

Retake on (in 3 months)

Date: ____ / ____ / _____ · Listings and breaches change.

STEP 3 · PICK YOUR FIXES

The fix bank, by path.

Ordered by how much exposure each removes for your time. Take the first one or two from your darkest paths.

Stolen

- [ ] **Secure your email account first** — 8 min
  Unique password, two-step sign-in by app or passkey, check forwarding rules.
- [ ] **Change every reused password** — 20 min
  Start with banking and shopping. A password manager makes this a one-time job.
- [ ] **Turn on breach alerts** — 2 min
  haveibeenpwned.com → Notify me.

Sold

- [ ] **UK: opt out of the open register** — 5 min
  gov.uk/electoral-register/opt-out-of-the-open-register.
- [ ] **US, California: one DROP request** — 15 min
  privacy.ca.gov/drop reaches every registered broker. Free.
- [ ] **Remove your top people-search listing** — 10 min
  Use the site's removal form; screenshot the confirmation.

Shared

- [ ] **Delete three accounts you no longer use** — 15 min
  Look for "delete account" in settings. Data that doesn't exist can't leak.
- [ ] **Turn off app tracking and ad ID** — 2 min
  Settings on page 8.
- [ ] **Turn on Global Privacy Control** — 2 min
  Built into some browsers; an extension for others.

Published

- [ ] **UK director? File SR01 for old filings** — 15 min
  Removes your home address from past documents; £34 per document.
- [ ] **Switch domain registration to private** — 5 min
  Most registrars offer a privacy setting, often free.
- [ ] **Note what can't change** — —
  Some records are required by law. Clean the copies instead (Sold, Indexed).

Posted

- [ ] **Look at each profile as a stranger** — 10 min
  Most apps have a "view as public" option. Hide birthday, phone, email, employer.
- [ ] **Turn off "find me by phone or email"** — 5 min
  In each social app's privacy settings.
- [ ] **Close or clean one old account** — 10 min
  Forums, dating and CV sites with your real name.

Indexed

- [ ] **Fix the source page first** — —
  Removing only the search result leaves the page up.
- [ ] **Request removal of contact-detail results** — 10 min
  Google "Results about you" where available, or Google's removal request; Bing has its own form.
- [ ] **Clear outdated snippets** — 5 min
  Once a page has changed, use Google's "Remove outdated content" tool.

BONUS · ASK THE MACHINES

Five AI prompts that need no private data.

AI assistants are useful for privacy work, as long as you don't feed them what you're trying to protect. Never paste passwords, ID numbers, bank details, or other people's information. Use the **[brackets]** as placeholders and fill them in yourself afterwards.

1 · What does AI say about me?

Indexed · 2 min

> What can you tell me about **[full name]** who lives in **[town]**? List any contact details, address, employer or family members you find, and the source of each.

2 · Decode a privacy policy

Shared · 3 min

> Here is the privacy policy of **[company]**: **[paste the policy, or its link]**. In plain English: what does it collect, does it sell or share data for advertising, with which kinds of companies, and where exactly is the opt-out or delete-account option?

3 · Is this message a scam?

Stolen · 1 min

> Is this message likely to be a scam? List the warning signs and what the real company would do instead: **[paste the message with your name, numbers and links deleted]**

4 · Draft a deletion request

Sold · Shared · 2 min

> Write a short, polite email asking **[company]** to delete my account and personal data and stop using it for marketing, under **[UK GDPR / EU GDPR / my US state's privacy law]**. Use placeholders for my name and account details. Don't invent legal deadlines.

5 · Lock down a device

Shared · Posted · 5 min

> Give me the exact menu steps, for **[phone model and software version / app name]**, to turn off ad tracking, location history and public profile visibility. If a setting has moved in recent versions, say so.

AI can be wrong or out of date. Check any menu path or legal point against the official source before relying on it.

BONUS · TEN-MINUTE SETTINGS

Stop the apps learning more.

Settings that cut what is shared from today. They don't erase what was collected before. Menu names move between versions; search the settings for the key word if a path doesn't match.

WHERE	WHAT TO SWITCH
iPhone	Settings → Privacy & Security → Tracking → turn off "Allow Apps to Request to Track".
Android	Settings → Security & privacy → Privacy → Ads → Delete advertising ID. (Samsung: Security and privacy → More privacy settings → Ads.)
Browser	Turn on Global Privacy Control, an opt-out signal some US state laws require companies to honour. Built into Brave and DuckDuckGo, and in Firefox's settings. Chrome, Safari and Edge need an extension. See globalprivacycontrol.org.
Facebook and Instagram	Accounts Centre → look for "Activity from other businesses" (older accounts: "Your activity off Meta technologies"). It shows which businesses send Meta data about you, and limits how it is used for ads.
ChatGPT	Settings → Data controls → turn off "Improve the model for everyone". To ask OpenAI about personal data it holds, use privacy.openai.com.
Gemini	Gemini Apps Activity → turn off "Keep activity" (myactivity.google.com/product/gemini).
Claude	Settings → Privacy → turn off the "Help improve Claude" setting.

These apply to future activity. Opting out of AI training applies to new chats; it does not remove past chats from models already trained.

WHAT COMES NEXT

A snapshot goes out of date. A record doesn't.

Your map will change next month: a new breach, a listing that comes back, an app you forgot. Koverr is being built to keep the map for you, across all six paths, with the fixes ranked, the requests drafted for your approval, and every result dated.

Join the launch list ·koverr.com

Your map, kept current

Rechecked on a schedule, not when you remember.

Three fixes at a time

Ranked by exposure removed per minute of your time.

You approve every request

Nothing is sent in your name without your yes.

A dated record

What was found, what was asked, what was checked.

Checked on 12 November 2026; recheck from February 2027. This self-check is general information, not a security assessment or legal advice. A score is not a measure of risk or a guarantee of safety. Koverr is pre-launch and is not affiliated with any service named here.
